MADRID PROTOCOL

EPSTEIN DRANGEL BAZERMAN & JAMES, LLP has created a series of fixed fee packages for the prosecution of trade and/or service mark applications in the U.S. filed under the Madrid Protocol.

Why?

In the United States over half of all trademark applications filed will receive an Office Action. The number is even higher for applications originating from outside the U.S.

The primary reason for most rejections is that, unlike many other jurisdictions, the identification of goods and recitation of services for a trade or service mark filed with the United States Patent & Trademark Office (USPTO) must be specific.

Consequently, foreign applicants now filing for trade and/or service marks in the U.S. under the Madrid Protocol will most likely receive Official Actions on Requests for Extension of Protection.

Benefits to you are:

- experienced local counsel
- guaranteed fixed fees
- professional quality service
- securing the right protection for your marks

ipEdge is our proprietary trademark monitoring and docketing system which allows our clients (whether associate law firms, corporations or individuals) to quickly and accurately access the status of their trademarks anytime, anywhere at the click of a button.

This is a value-added service to our clients with no additional charges or hidden fees.

Our clients can easily review their Trademark Portfolios by going to <http://www.ipcounselors.com>, clicking on the *ipEdge* link and entering their unique client user name and password.

Our clients use ipEdge because it ...

- is an easy to use web-based trademark database;
- has secure password protected access for individual client access 24 hours a day;
- automatically updates status information daily from USPTO records, eliminating bureaucratic delays in notification of developments in the trademark application process and avoids missing deadlines due to lost or misplaced correspondence from the USPTO;
- is a user friendly, simple touch of the button operation to search, check status and prepare customized reports for your trademark portfolio.
